

KRISHNA PUBLIC SCHOOL, RAIPUR

HALF YEARLY EXAM - 2026-27

CLASS - XI

SUBJECT – Computer Science [083]

PRACTICAL FILE

Instructions:

1. Students will solve all questions given in the list and will submit programs (solutions + output) in a single pdf file(In GCR only , No HardCopy).
 2. Students may use math modules to solve questions.
 3. Solve all given questions serially.
 4. All programming questions are to be answered using Python Language only.
-

Q1. Write a Python program to input two numbers and display their **sum, difference, product and quotient**.

Q2. Write a Python program to input the **length and breadth** of a rectangle and calculate its **area and perimeter**.

Q3. Write a Python program to input the **radius of a circle** and calculate its area and circumference. Use **3.14** as the value of π .

Q4. Write a Python program to input **principal amount, rate of interest and time** and calculate the Simple Interest and Total Amount.

$$SI = P \times R \times T / 100$$

$$\text{Amount} = P + SI$$

Q5. Write a Python program to input the **marks obtained in five subjects** and calculate the **total marks and percentage**.

Q6. Write a Python program to input a temperature in **Celsius** and convert it into Fahrenheit.

$$F = 9 \times C / 5 + 32$$

Q7. Write a Python program to input a number and display its **square, cube and fourth power**.

Q8. Write a Python program to input two numbers and **swap their values** using Python's multiple assignment statement.

Q9. Write a Python program to input a distance in **kilometres** and convert it into miles.

Use: $1 \text{ km} = 0.621371 \text{ miles}$

Q10. Write a Python program to input the **base and height of a triangle** and calculate its area.

$$\text{Area} = 1/2 \times \text{Base} \times \text{Height}$$

Q11. Write a Python program to input a number and check whether it is **positive, negative or zero**.

Q12. Write a Python program to input a number and check whether it is **even or odd**.

Q13. Write a Python program to input **three numbers** and display the **largest number**.

Q14. Write a Python program to input a student's marks and display the grade according to the following criteria:

Marks	Grade
90 and above	A
75–89	B
50–74	C
Below 50	D

Q15. Write a Python program to input a number and check whether it is **divisible by both 3 and 5**.

Q16. Write a Python program using a **for** loop to display the numbers from **1 to 20**.

Q17. Write a Python program to input a number and display its **multiplication table from 1 to 10**.

Q18. Write a Python program using a **while** loop to calculate the **sum of numbers from 1 to 10**.

Q19. Write a Python program to input a positive integer and calculate the **sum of its digits**.

Example: **1234 → 10**

Q20. Write a Python program to input a number and check whether it is a **prime number or not**.
