

Chapter Name

Getting Started with Python

Index:

1. What is Python?
2. Python Pluses
3. Python Minuses
4. All Possible Application/Software to use for writin Python Program

1. What is Python?

1. Python programming language is a High Level Programming language
2. Was developed by Guido Van Rossum in Feb1991.
3. Python is based on or influnced by two language:
 - ABC language
 - modula-3

Python - was named after famous BBC comedy show namely Monty Python's Flying Circus

2.Python - Pluses

1. Easy to use

Very simple Syntax rules

2. Expressive Language

Reason - fewer lines of code, simpler syntax

In C++ Lang

In []:

```
1  int a=10,b=20,TEMP;  
2  TEMP = a;  
3  a=b;  
4  b=TEMP;
```

In Python Lang

In []:

```
1 a,b=10,20
2 a,b = b,a
```

3. Interpreted Language

It easy to debug language

4. Completeness

5. Cross-Platform Language

6. Free and Open Source

7. Variety of Usage/Applications

3.Python - Minuses

1. Not the Fastest Language

2. Lesser Libraries than C,Java,Perl

3. Not Strong on Type-binding

In C++ Language

In []:

```
1 int x = 10.25
```

In Python Language

In [5]:

```

1 x = 10
2 y = "20"
3 c = x+y
4 print(c)

```

```

-----
TypeError                                Traceback (most recent call last)
<ipython-input-5-01fde14c3053> in <module>()
      1 x = 10
      2 y = "20"
----> 3 c = x+y
      4 print(c)

```

TypeError: unsupported operand type(s) for +: 'int' and 'str'

4. Not Easily Convertible

4. All Possible Application/Software to use for writing Python Program

1. Python IDLE
2. Jupyter Notebook (Anaconda Distribution Suit)
3. Spyder (Anaconda Distribution Suit)
4. Pycharm
5. VScode

1. Python IDLE

Link to download this application: <https://www.python.org/downloads/release/python-396/>
[\(https://www.python.org/downloads/release/python-396/\)](https://www.python.org/downloads/release/python-396/)

Two different Mode of writing program into Python IDLE :

1. Interactive Mode
2. Script Mode

1. Interactive Mode:

- It allows coder to write one line of code after >>> sign and after pressing enter button code will be executed & output will come.

2. Script Mode:

- It allows user to write multiple lines of code into single window and execute all of them together in group format.

Link to download Anaconda Navigator for using following applications:

- Jupyter Notebook
- Spyder

https://repo.anaconda.com/archive/Anaconda3-2021.05-Windows-x86_64.exe

(https://repo.anaconda.com/archive/Anaconda3-2021.05-Windows-x86_64.exe).
